Re: 1992 Energy Policy Act Which Amended the Nuclear Waste Policy Act to require the Environmental Protection Agency To Set Radiations Standards Specific To Yucca Mountain Repository

Do not let DOE and NRC weaken standards allowing higher exposure limits and lose ground water protection.

You have already received a letter from Citizen Alert and signed by twenty-six groups nationwide who have expertise on radiation issues. We urge you not to weaken the above standards. At no point in the future should life in the area surrounding Yucca Mountain become expendable.

The undersigned is adding her voice to the many in Nevada and other parts of the United States, who are rightfully worried about the present and future citizens who will be contaminated by Yucca Mountain.
